

# RMG014DG

The RMG014DG is a flat top, partial privacy gate with vertical solid infill, providing a modern and streamlined design.

Although aluminium is very strong, it is also lightweight which makes it a versatile material. This is perfect for the fabrication of gates compared to traditional metals such as; wrought iron, cast iron, wood or stainless steel.

Another advantage of the 014DG is that it is very low maintenance. Aluminium is highly resistant to corrosion unlike other metals, it will not suffer from changing weather conditions and actually becomes stronger in low temperatures, perfect for UK buyers!

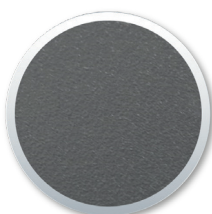

In order to keep the gate looking brand new, simply wash down with soapy water and rinse. There is no special treatment required and the gates also have a 5 year manufacturer's guarantee.

- ✓ Various sizes available.
- ✓ Custom colours available.
- ✓ Powder coated finish.
- ✓ Modern and stylish.
- ✓ Robust and lightweight.
- ✓ Very low maintenance.
- ✓ Wall or floor mounted optional fixings.
- ✓ Driveway gates can be manual or electrically automated.
- ✓ Easy installation.
- ✓ Weather resistant.
- ✓ Five year manufacturer's guarantee.

Colours available:

Black  
(RAL 9005)

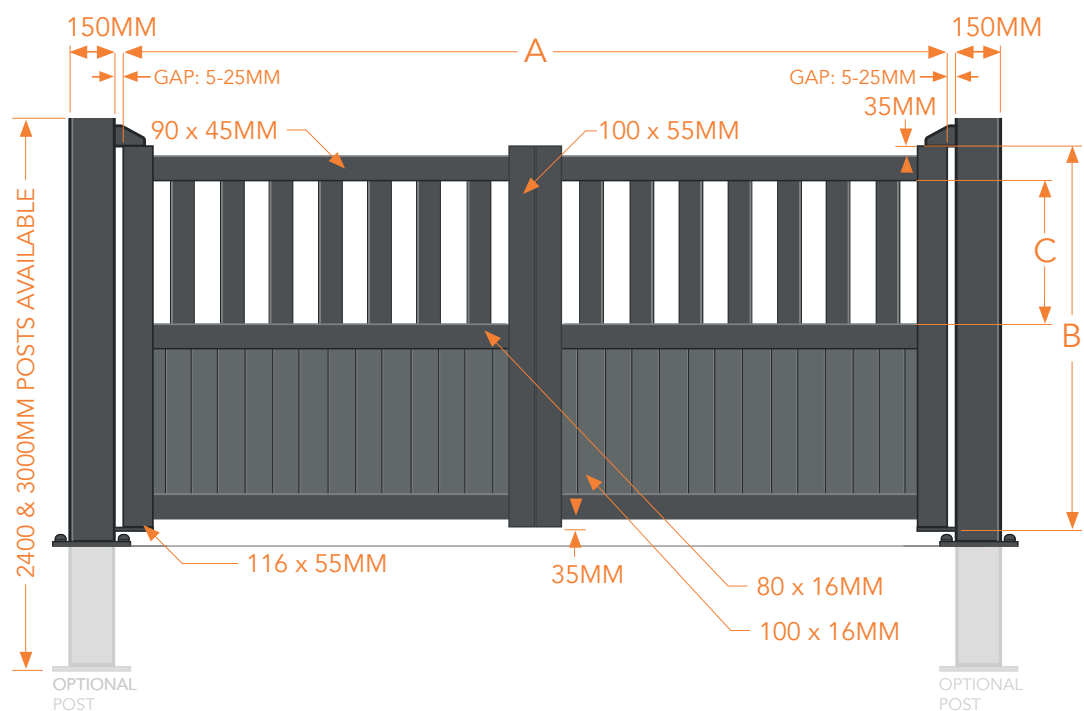

Grey  
(RAL 7016)

Bespoke colours  
available on request.
